Software specifications

Chapter number	Software required (With version)	Free/Proprietary	If proprietary, can code testing be performed using a trial version	If proprietary, then cost of the software	Download links to the software	Hardware specifications	OS required
All	Node.js 4.3 or later	Free	-	-	https://nodejs.org/en/download/	-	Any
All	Serverless Framework v1.0 or later	Free	-	-	https://serverless.com/	-	Any

Detailed installation steps (software-wise)

The steps should be listed in a way that it prepares the system environment to be able to test the codes of the book.

1. Node.js:
    a. Download the latest package for your OS at https://nodejs.org/en/download/
    b. Installing is pretty straightforward, but you can refer to the official docs about how to install if you have any issue: https://docs.npmjs.com/getting-started/installing-node
    c. For each package source code, run the command "npm install" to install the package dependencies.
2. Serverless Framework:
    a. After installing node, run the command: "npm install serverless -g"
